

**MEMORANDUM**  
**Development Services Department**  
**Building & Code Enforcement Divisions**

TO: File

FROM: Michael E. Story, Development Services Director  
Robert Watson, Building & Code Enforcement Supervisor

DATE: September 28, 2010

SUBJECT: Wind Load Calculation Requirements

---

As of October 23, 1995, the wind load calculation for the City of Rialto, by Building Official Policy, is as follows; North of Foothill Boulevard shall be calculated at 100 mph exposure "C" (Basic wind speed = 120 MPH 3 sec. gust) and south of Foothill Boulevard shall be calculated at 90 mph exposure "C" (Basic wind speed = 104 MPH 3 sec. gust). This may be calculated by using 2010 California Building Code Table 1609.6.2(1) & (2)
